

NIR Industrial Resources Ltd

A Concern of NIR Enterprise

WEAVING LOOMS AND SPARE PARTS. DYEING & FINISHING. USED & NEW MACHINERY
INDUSTRIAL COMPRESSORS

Founded in 1986, NIR ENTERPRISE has built a fruitful career as a trustworthy partner for various textile sectors. We engage in a wide range of commercial activities, including the sale of textile machinery and accessories, lubricants, and spare parts for looms.

During our extensive journey, we have successfully delivered more than 3,500 looms (both new and used), along with a vast amount of processing, dyeing, finishing, and printing equipment. Additionally, we provide the following top-quality products sourced from various countries:

Qingdao Haijia Machinery Co.,Ltd. (hereinafter referred to as "Haijia") is a leading global supplier of shuttleless looms with advanced technology and high quality. After 27 years of development, we have built up an internationally competitive company with R&D, manufacturing, marketing and after-sales service, focusing on water jet looms and air jet looms.

Air Jet Loom

Water Jet Loom

From 1967, ITG Group is a leading industrial conglomerate dedicated to providing world class textile machinery and integrated engineering solutions. With over a decade of expertise, ITG Group specialize in delivering high-precision spare parts and advanced technology to enhance global manufacturing productivity.

Rigamonti & Perego – Founded in 1964, the company has evolved from a mechanical and textile workshop into a leading manufacturer of aluminum and steel products, specializing in high-precision weaving beams. With an in-house foundry since 2002, it serves diverse markets, including energy, hydraulics, and urban furnishings, delivering world-class durability and engineering excellence.

Zanfrini Srl – Established in 1948 in Como, a global leader in weaving reed manufacturing. Serving all types of weaving machines and fabrics, including clothing, furnishing, technical, and filtration textiles. Renowned for superior quality, reliable delivery, and efficient after-sales service.

TEXFAB Engineers India Pvt. Ltd. – A leading manufacturer of fabric processing machinery, offering complete textile solutions including steaming, washing, mercerizing, bleaching, and dyeing machines. Known for advanced technology, strong R&D, and reliable after-sales service, TEXFAB delivers high-quality solutions to both domestic and international markets.

TONYUA
— 通源 —

Jiangyin Tongyuan Textile Machinery Co., Ltd. Pioneering manufacturer of textile sampling equipment and state standard drafter for warping, sizing, and rapier weaving machines.

ITG/NIR – A strong alliance in industrial equipment, delivering advanced compressed air solutions powered by Eclat Air. Combining expertise and innovation, we provide efficient, reliable systems with comprehensive service and support.

ALUCHEM LUBRIFICANTI SPECIALI

Aluchem S.p.A. is an Italian company founded in 1975 that produces synthetic and specialty lubricants for many industries. It was the first in Italy to develop non-toxic lubricants for food, pharmaceutical, and cosmetic sectors, as well as biodegradable products. The company offers solutions for compressors, gears, hydraulics, and bearings, and focuses on environmentally friendly lubrication.

Second Hand Textiles:

We specialize in the sale of premium second-hand textile machinery from top manufacturing countries including Korea, China, Europe, and Turkey. Our range includes a variety of machines suitable for different textile processes, ensuring quality, efficiency, and competitive pricing.
